

## Agricultural Marketing Service, USDA

## § 983.41

Shell, Shipping Point and Market Inspection Instructions," June 1994; revised September 1994, HU-125-9(b). Copies may be obtained from the Fresh Products Branch, Agricultural Marketing Service, USDA. Contact information may be found at <http://www.ams.usda.gov/fv/fvstand.htm>.

(f) *Certification of minimum quality.* Each inspector shall complete minimum quality testing and reporting and shall certify that every lot of California pistachios or portion thereof shipped domestically meets minimum quality levels. A record of each test, along with a record of final shipping disposition, shall be kept by each handler. These records must be maintained for three years following the production year in which the pistachios were shipped, and are subject to audit by the committee at any time.

[69 FR 17850, Apr. 4, 2004, as amended at 70 FR 40186, July 13, 2005]

### § 983.40 Failed lots/rework procedure.

(a) *Substandard pistachios.* Each lot of substandard pistachios may be reworked to meet minimum quality requirements.

(b) *Failed lot reporting.* If a lot fails to meet the aflatoxin and/or the minimum quality requirements of this part, a failed lot notification report shall be completed and sent to the committee within 10 working days of the test failure. This form must be completed and submitted to the committee each time a lot fails either aflatoxin or the minimum quality testing. The accredited laboratories shall send the failed lot notification reports for aflatoxin tests to the committee, and the handler, under the supervision of an inspector, shall send the failed lot notification reports for the lots that do not meet the minimum quality requirements to the committee.

(c) *Inshell rework procedure for aflatoxin.* If inshell rework is selected as a remedy to meet the aflatoxin requirements of this part, then 100% of the product within that lot shall be removed from the bulk and/or retail packaging containers and reworked to remove the portion of the lot that caused the failure. Reworking shall consist of mechanical, electronic or manual procedures normally used in

the handling of pistachios. After the rework procedure has been completed the total weight of the accepted product and the total weight of the rejected product shall be reported to the committee. The reworked lot shall be sampled and tested for aflatoxin as specified in § 983.38 except that the lot sample size and the test sample size shall be doubled. The reworked lot shall also be sampled and tested for the minimum quality requirements. If, after the lot has been reworked and tested, it fails the aflatoxin test for a second time, the lot may be shelled and the kernels reworked, sampled and tested in the manner specified for an original lot of kernels, or the failed lot may be used for non-human consumption or otherwise disposed of.

(d) *Kernel rework procedure for aflatoxin.* If pistachio kernel rework is selected as a remedy to meet the aflatoxin requirements of § 983.38, then 100% of the product within that lot shall be removed from the bulk and/or retail packaging containers and reworked to remove the portion of the lot that caused the failure. Reworking shall consist of mechanical, electronic or manual procedures normally used in the handling of pistachios. After the rework procedure has been completed the total weight of the accepted product and the total weight of the rejected product shall be reported to the committee. The reworked lot shall be sampled and tested for aflatoxin as specified in § 983.38.

(e) *Minimum quality rework procedure for inshell pistachios and kernels.* If rework is selected as a remedy to meet the minimum quality requirements of § 983.39, then 100% of the product within that lot shall be removed from the bulk and/or retail packaging containers and processed to remove the portion of the lot that caused the failure. Reworking shall consist of mechanical, electronic or manual procedures normally used in the handling of pistachios. The reworked lot shall be sampled and tested for the minimum quality requirements as specified in the minimum quality regulations of § 983.39.

### § 983.41 Testing of minimal quantities.

(a) *Aflatoxin.* Handlers who handle less than 1 million pounds of assessed
